In the original article, there was a mistake in **Figure 1** as published. The legend incorrectly stated “*NO=participants with psychological distress. YES=participants without psychological distress”. The correct version is “*NO=participants without psychological distress. YES=participants with psychological distress.” The color of this legend has been changed from red to black.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
